Super Interesting Facts For Smart Kids: 1272 Fun Facts About Science Animals Earth and Everything in Between

Smart kids? I think the book is full of information for everyone old and young. **Super Interesting Facts For Smart kidsquest children's** 144 pages New author Jordan Moore steps onto the Trivia stage with a nod to providing interesting reading material while passing the time at home In this easy to read (and absorb) book Jordan offers a cascade of facts that provide not only entertainment but also educational topics - not only for kids but for everyone who is curious! Providing an overview of the topics of interest in this book Jordan outlines his content in the Introduction - 'The world is full of interesting things just waiting to be discovered...this book has precisely 1272 facts covering everything from the sun and the moon in outer space to the animals and plants here on earth - plus food and drink film and TV words and languages sports and games ad a lot besides! Some of these facts are funny. **Super Interesting Facts For Smart kidsquad** But all of them are SUPER INTERESTING!' And if that tasty intro doesn't convince you to explore this fascinating book add in facts about mythology kings and queens the human body the weather and weird words that will amaze! Not only is the book entertaining - it is also very instructive. **Super Interesting Facts For Smart kidsquest museum** Jordan presents his facts in categories each fact is short in length and offers a check box to let you know you've absorbed that one and moves along at a pace that is entirely up to each reader. **Super Interesting Facts For Smart kidsme** For those who are simply looking for solid entertaining reading to while away the hours welcome to a field expert! Highly recommended! 144 pages There is a range of interesting factual excerpts within this book (separated into categories but limes sink. **Super Interesting Facts For Smart kidsme** Some other sources outside of this book claim the following for the reasons why: Julius Caesar added three extra intercalary months to recalibrate the calendar in preparation for his calendar reform which went into effect in 45 BCE. **Super Interesting Facts For Smart kidsmania** This book is a goldmine for kids as it expands on things they are learning in school and is laid out in such a way that it is easy to pick up and put down in addition to being an easy book to go back to look out a particular fact.

Super Interesting Facts For Smart kidsongs

) that should appeal to children who love to digest new information to share with their friends and family. **Super Interesting Facts For Smart kidsmiling** The book keeps it simple and does not attempt to explain the relevance of the information, **Super Interesting Facts For Smart**

kidsmatter It would serve well if some of this information was used within a trivia board game.

Super Interesting Facts For Smart kidsville 144 pages This is a super interesting book for both kids and adults: **Super Interesting Facts For Smart kidsmatter** I learned some information in this book that I did not know before reading this book. **Super Interesting Facts For Smart kidsource** Some of the interesting information mentioned in this book include the following information: Flies can't hear their own buzz. **Super Interesting Facts For Smart kidsmania** Leotards are named after a French trapeze artist named Jules Leotard: **Super Interesting Facts For Smart kidstube** Lots of it! Which brings to my only criticism of the book the information is crammed together (I didn't know how to fix that either so 5 stars), **Super Interesting Facts For Smart kidsmania** One question: The year 46 BCE had 445 days Why? Would have been nice to know the reason: **Super Interesting Facts For Smart kidsme** 95% of the universe is invisible because it is made of mysterious dark matter and dark energy that does not interact with light. **Super Interesting Facts For Smart kidsquest museum** This year therefore had 445 days and was nicknamed the year of confusion and serves as the longest recorded calendar year in human history: **Super Interesting Facts For Smart kidsmania** 144 pages As an adult reading this book I learned things I've never heard or seen before. **Super Interesting Facts For Smart kidspace** An amazing collection of facts the average person and kid may not know: **Super Interesting Facts For Smart kidstart** Twelve chapters divide these amazing facts into sections including Space Sport History Geography Sport Science Words and Language and Arts, **Super Interesting Facts For Smart kidsmania** One of the many things I enjoyed about this book is that the facts don't end the conversation on these aspects of our lives but encourages research and conversation. Can be a good party conversation book too. Some of these facts are strange. Some of them are surprising. Half of the world's orange juice comes from Brazil. The German city of Hamburg has 2300 bridges. The year 46 BCE had 445 days. The actual planetary orbit year remained the same. A wonderful book! 144 pages.
